Description

Nexans offers a full range of empty patch panels for 24 snap in connectors.

This range is suitable for all snap in connectors in Nexans product portfolio. (LANmark-7, LANmark-6, LANmark-5 and Essential). This range uses an exclusive Nexans snap-in system to install the connectors.

The offering is Nexans branded and shows a perfect visual homogeneity when they are used with other Nexans products in a cabinet.

The patch panels are designed for any 19" cabinet and have 1 HU height.

The fixed panel offers following features :

- clip on mechanism : enhanced strain relief , earthing and grounding features with Nexans exclusive design.
- compatible with all Nexans snap- in format connectors.
- 24 ports **with shutters included**.
- strong metalwork.
- printed numbering system.
- also available in **black**(N521.661BK)
